

Mitcorp

X3000 3D Measurement Industrial Videoscope

The world's first dual view 3D measurement videoscope

Reconstruct & Measure in 10 Seconds.

Measurement Functions

A full-screen full-size 3D model display, coupled with intuitive 3D point selection, simplifies complex measurements. The system constructs a detailed 3D model in just 10 seconds, streamlining the analysis process, while its user-friendly interface ensures effortless operation.

The X3000 offer multiple dimension functions;

Versatile Features

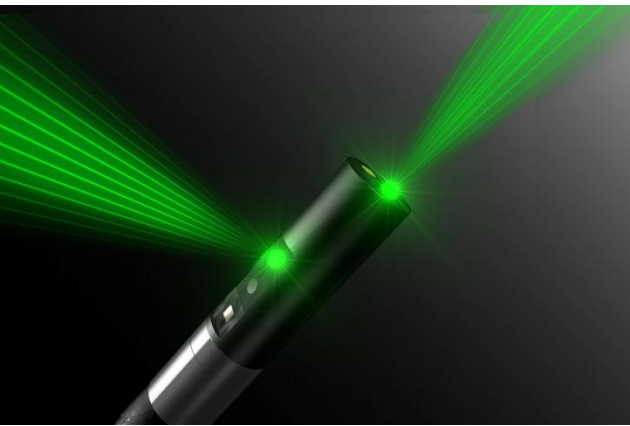

X3000 comes with a unique hardware and accessories. It supports monopod, swappable batteries, and rigid sleeve. !

Mitcorp's Active Stereo technology is powerful to 3D reconstruct up to 80% of the snapshot image. Which accelerates the inspection overall time and shorten engine down-time.

The 3D reconstruction quality comparable to 2D imaging, ensuring high-detail visualization in wide exceptional image quality & super wide 3D measurement range making it easier and more precise than ever to select measurement points.

Patented Dual-View Measurement

The innovative dual-lens design allows you to capture multiple viewing angles without changing probes.

The X3000 system offers instant measurement data capture without static waiting time, ensuring rapid and accurate analysis.

Wide 3D Measurement Range

Mitcorp's Active Stereo technology is powerful to 3D reconstruct up to 80% of the snapshot image. Which accelerates the inspection overall time and shorten engine down-time.
